Unit – 3

3. Write a precise of the following passage and supply a suitable title for it :

It is not enough that the right thing is done . It must be done at the right time. A timely remedy saves much future trouble. On the contrary those who do not do so have to toil and suffer a great deal. A wrong must, therefore, be set right without the least delay. If things are allowed to take their course and not mended well in time, it is often too late to mend them. If a hole in a piece of clothing, for example, is neglected in the beginning. It is bound to grow bigger and bigger and will need many stitches to mend it. A little fire, if it is not immediately put out, it will become a huge flame in no time. A common disease like cough, if it is not taken care of in the beginning, may develop into a serious disease and even prove fatal. If neglected in the beginning a small misunderstanding between friends may result in the end of friendship and a small dispute between countries may lead to war. We must therefore, remember that fore-warned is fore-armed and learn to take the right action at the right time.

Unit-4
